

Building an Effective Board of Directors

March 14, 9:00 a.m. to 12:00 p.m.

Builders Exchange of Rochester
180 Linden Oaks
Rochester, NY 14625

Most boards of directors focus on helping their organizations be more effective, but few give the same degree of attention to how the board itself could do its job better. A truly effective board understands its role and responsibilities in the context of the entire organization, and monitors and improves its own performance on a regular basis. Those that do find it actually makes their jobs easier.

Topics include:

- Assessing your board’s needs and recruiting new members
- Responsibilities and expectations of board members
- Using a “job description” as a means of guiding your board
- Structuring relationships between the board, committees, and staff
- Using committees to do the work of the board

Cost: \$75 per person (please inquire about group discounts) — includes parking, refreshments, and resource materials that organizations can customize for their specific needs. *Pre-registration is required.*

Instructor: Nonprofit Works president Paul Mastrodonato, who serves on and advises boards of directors on their role and how to be more productive
